

Solus

Stannah

Maria is a perfectionist. She enjoys keeping busy, always having something more to do. Now Maria has a Stannah stairlift it means she can keep everything upstairs as spotlessly clean as it is downstairs.

Keeping things simple takes the stress out of life and you'll find using our Solus stairlift effortless. Developed with one of Europe's leading product design agencies Seymour Powell, the Solus is designed to be comfortable, intuitive and easy to use.

The chair

To go up or down the stairs you simply move the controls left or right and for added safety the built in sensors prevent the stairlift moving until you are securely in the chair. When not in use the chair folds up effortlessly; simply raise the arms and the seat and footrest follow, leaving your stairs and hallway clear and tidy.

The rail

The Solus chair is available for all staircases. For straight stairs, the Solus is fitted to a strong rail which is available in a silver or bronze finish. Our curved stairlifts are tailor-made to fit your individual staircase to ensure the best fit possible. The twin rails are available in a pearl colour as standard, with an additional five colour options.

Our rails are fitted to the stairs, not to the wall and installation is quick and clean, meaning minimum fuss and disruption in your home.

New and reconditioned models

Our Solus chairs are available to buy as either new or reconditioned models. All pre-used stairlifts are reconditioned and rigorously tested by our team of engineers using a 42 point check, before being fitted in your home.

Our rental scheme

You can also rent our Solus stairlifts which allows you to enjoy the benefits of a new or reconditioned Stannah whilst paying for the stairlift one month at a time. We will take care of the servicing for you and remove it when you no longer need it.

The service

The reliability of our stairlifts comes from the quality of the engineering and design. For your added peace of mind, all our new and reconditioned products are backed up by a full warranty and service package. Just like any piece of machinery, we recommend that your stairlift is serviced annually by a trained engineer. We will arrange with you to come and visit to give the stairlift a thorough and complete service, putting it through its paces.

You won't have to wait for service or help as our nationwide teams of engineers are locally-based. They are on standby 24-hours a day, 365 days a year to respond quickly in the unlikely event that you might need assistance.

Self-charging battery

The Solus always has the optimum amount of power, so you get a smooth ride with a gentle start and stop. It even works if there is a power cut.

Easy-to-use controls

Right-handed or left-handed, we can put the controls on either arm. The control pod is simple and easy to use, even for those with less able fingers.

Adjustable arms

We can adjust the position of the arms to suit you, which means you have easy access to the controls.

Removable link bars

The link bars can be removed to allow for an easy transfer from a wheelchair.

Adjustable seat height

On straight stairs, we can adjust the height of the seat, so it's at the most comfortable setting for you, allowing you to get off the chair easily and without fuss.

Seat-load sensor

The extra safe sensor feature means that your stairlift won't move until you're sitting safely in the seat.

Safety edges

If there is something blocking the chair on the stairs, the safety edges recognise this and the lift will stop automatically.

Wall control

You can use the wall controls to call the stairlift for yourself or send it to someone else.

Upholstery material

You can choose from a range of colours and modern textiles to suit the look of your home.

Curved model featured

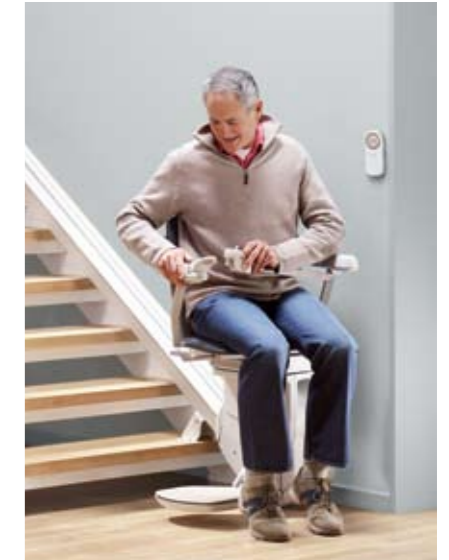

One-step folding

To store the stairlift away, fold the arm and the seat and footrest folds away with it. There's no awkward bending down, which is particularly useful at the top of the stairs.

Swivel seat

Using the levers enables you to swivel the seat easily, making it simple to get off the chair. Alternatively, you can choose to have a powered swivel seat, which turns the chair to face the landing automatically.

Optional two-way powered swivel

If space is limited at the bottom of the stairs, the two-way powered swivel will enable you to get off the chair with ease.

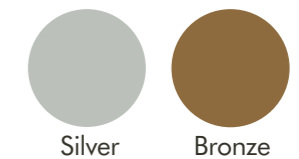

Easy-to-use seatbelt

Fastening the seatbelt with one hand is simple and easy and gives you added security.

Straight rails

Fitted to the stairs and not to the wall, the straight rail is available in a silver or bronze finish.

Curved rails

Fitted to the stairs and not to the wall, the twin curved rails are available in a pearl colour as standard with an additional five colour options.

1. Using the Solus is simple and easy. The unique one-step fold feature means you can lower the arm, and the seat and footrest will unfold simultaneously.

2. You can take your time getting seated as the seat-load sensor will ensure that the chair will not move until you are ready to go. Fasten the seatbelt for added security.

3. By pressing gently on the easy-to-use controls in the direction you wish to go, you can travel up or down the stairs.

4. Once at the top of the stairs, you can swivel the seat to face the landing, allowing you to get off the chair in complete safety.

5. If you wish, you can leave the chair in the swivelled position, creating an effective safety barrier.

6. When you are not using the stairlift, it can be folded away so that it takes up less space and leaves the stairs clear for other users.
